CAMPUS INFORMATION & MANAGEMENT SYSTEM

Today's Institution of Higher Learning has a lot of data and it is very important that this data is made use of meaningfully, efficiently and effectively for maximum achievement. There should be a way harness all the information available so that it could be of high value to the Institution.

CampuxFlex Campus Information and Management System (CIMS) - is a solution that involves all aspects of an advance campus & student management system.

CampuxFlex automates and streamlines the campus management processes thus allow-ing the Institution management to improve their work processes and at the same time saving resources and costs.

SYSTEM OVERVIEW

Campus Facilities

Examination & Grading

System Administration

Report Centre

CampuxFlex Core

General

- Scalable to fit all types of needs
- Data Consolidation thus eliminating redundancy
- Simple and straightforward
- Accessible anytime, anywhere
- Modular and Flexible with Multi-Campus option
- Promotes resource optimization
- Users Audit Trail
- Able to integrate other Applications like Financial Accounting System, E-Leave System and Payroll System.

Management

A solutions that enables an institute to manages all its students and campus needs Different modules available covers all the different aspects of the institutes management thus saving them from having to have a few different system to cater to the different needs. Daily manual routines can be automated so the administrative processes can be more efficient. This will reduce the cost of running the institute as less time are needed for each task. Management Reports with analytic tools will enable the management to have a better overall picture so that they can make a better decision Centralized system for the different stakeholders in the institute [staff, Students & Parents] makes it easy for them to communicate and also for the school to distribute as and when needed.

Lecturers

Schedules and Weekly workload management are easily accessible Repetitive and manual tasks are reduced through automation for the lecturers

Since the system can be accessed anywhere anytime it allows the lecturers easy access to all the information needed for their work

Administration

Centralization of data reduces redundancy freeing up some of the resources for more productive tasks.

Automation of manual processes improves the institute's efficiency.

Reports which are available for the different modules helps the management to have an up to date picture of the institute.

Flexible and simple setup of the system parameters controlling the different aspects of an institute allows an easy control of all the school's administration processes

Students

Students can easily access all their information in one place instead of having to go to different places just to find the information that they need.

Online accessibility of this systems allows the students to do online enrolment.

Alerts for the students will immediately be communicated to the students when they login to the system.

Students are able to communicate and submit their assignments online so it is very convenient for them.

Parents

Parents can login to the system to access all the relevant student's information including their statement of account and results.

All announcement from the institute will also displayed at the parents/guardian landing page.

Alerts and notification will also be displayed

Modules

The different modules in **CampuxFlex** gives the management a very convenient and up to date overall information of the institute so that they can come to an accurate and decisive decision.

Student Management

All the student's information can be accessed here and any student profile related information changes can be done through this module. Information such as NRIC, matriculation number, contacts, enrolment, results, statement of account, guardian, attendance are displayed here. Analytical tools on student's population and attendance data are available and the result can be downloaded for further analysis.

Staff Management

Staff Management centralizes all the related information such as profile, qualifications, timetable, weekly workload and directory. It provides easy management of the staff details and update of information can be easily done. Staff Population analysis can be done and the result can be exported for further manipulation.

Courses and Curriculum

Easy setup of different programs from Diploma to Doctorate even if they are from different collaborators. Multiple grading system are allowed with different pre-requisites, course fees for local and international students, subject schedules with different assessment structures for different subjects can be set.

Fees and Collection Management

Easy and seamless managements of fee payment controls like grace period for fee payment, refund management, actions when student did not pay. It allows management to specify certain actions whenever student defaults on payment. Reports are generated for payment done, outstanding payments and aging of outstanding fees.

Examination and Grading

Centralises all examination related process under this module. Examination scheduling, resit, updating of results, CGPA and CGPA processes with multiple grading system can be done here. Reports for results, examination candidates list and examination schedules can be generated easily.

Campus Management

Easily setup or update campus information on faculties, create events in the calendar, broadcast news and announcement to students or lecturers.

System Administration

All the system's administration processes such as manipulation of user's account, access, idle logout are controlled under this application. CampluxFlex has a number of security tools like and it trail, password policies, role permission and auto idle logout that the management can utilize to make their system more secure.

Student and Parent Portal

It is the point of access whereby students and guardian are able to access the all the related information on the student. Information such as profile, results, attendance, enrolments, statement of account can be accessed.
