WHAT IS
DOXAPPS

doxAPPS is a smart digital document filling system that is used to deliver a more efficient business document filling process. With the build-in intelligent "APIs/Business Connector" that will automatically pick up your documents from business application system and email based on the users pre-definition.

DoxApps Cloud Repository

An enterprise grade central cloud file repository that overcomes the issue of data loss and ransomware attacks by protecting the original save file from data corruption.

It allows files sharing & sync across platforms for easy access and yet provides an audit trial tracking the movement of the files flow and at the same time prevent critical information from being modified.
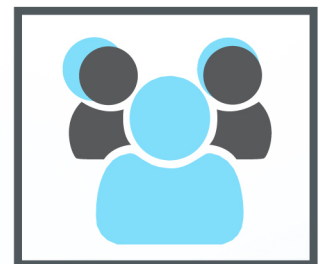

Collaboration

Receiving notification even when you're away, receive messages, SMS & emails from the Cloud when there's information being shared or updated

File Sharing

DoxApps is a secure file sharing and cloud storage solution that is password protected. It allows files of different format to be uploaded to a central depository and is accessible from any computer or mobile devices anywhere anytime. Files can be shared to an individual or to a group with an access key or with specific access permission.

User/Work Groups

Create work groups to enhance the data sharing and processing progress. Authorized or shared users shall be able to create groups and invite people to contribute towards the groups.

Calendar

Calendar allows you to manage schedules, track project deadlines and events. Events created in the calendar can be shared out to individuals or to a group and email notification are sent to them. DoxApps calender also has a feature that allows the recipient to respond to an invitation.
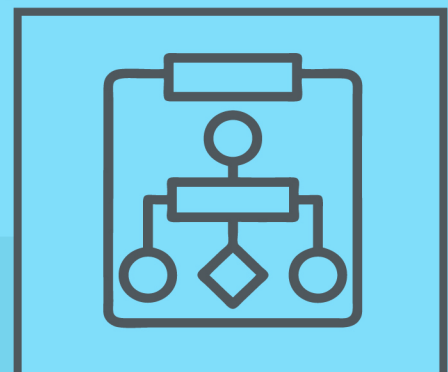

Policy & Control

Configure your own policy that will suit the way you manage your files and documents. Along with Multi factors authentication help strengthen the security.

Folder/File Access Control ensures documents are set to levels of privacy. An Audit trail to help track history & trace module of all the users in the database

Work Flow

Automating business process, in whole or part, during which documents, information or tasks are passed from one participant to another for action, according to a set of procedural rules. WorkFlow is able to assist in the following tasks:

Consistently apply business practices to processes.

Manage the movement of a process from start to finish.

Route the process to the right individuals to complete the task.

Guide users through their interaction with the process

Ensure an audit trail exists for each process.

Data Archiving

Archive and produce content that is fully threaded in it's original format. Comes along with a robust search function that is essentially responding to record requests in a timely manner. This will help creating an easy workflow and an organized database.

File Encryption & Security

Avoid unnecessary interception by unauthorized parties while transferring data across share devices and file syncing. Sensitive data Encryption that supports 256bit AES at rest and SSL 3.0 and TLS 1.0-1.2 for the web application and API in transit. This feature also provides Data loss Protection (DLP) and Remote Wipe capability.

Managing Your Mobile Devices (MDM)

Control your devices in your palms, Block untrusted device & untrusted network from accessing to your database to prevent loss of data and file. Revoke access instantly via remote wipe command should any authorized device found lost or stolen to minimize any unnecessary data exposure.
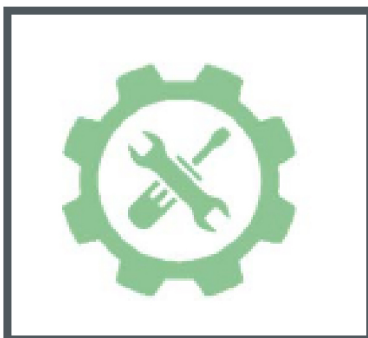

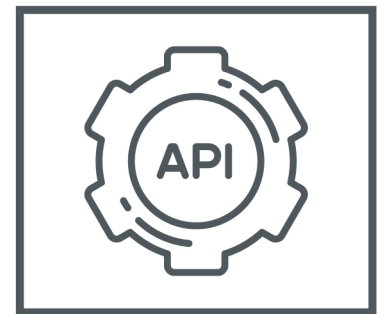

Branding & On Premise Cloud

You can Brand your own private "doxApps" Business Cloud system, hosted within your own business premises or a private cloud taking the advantages of flexibility and rapid deployment where your IT department manages the service but allows users to use the resources as their own.

APIs/Business Connectors

doxApps provides a range of APIs that enable data interoperability by integrating & connecting seamlessly with external/third parties applications. doxApps REST API lets you access content in an on-premise doxApps repository, or in doxApps cloud, from your inhouse applications.

Professional Services

doxApps Integrations

Providing doxApps integration services with your business applications over different platforms. doxApps platform integration shall fully benefit you in your business operation and eventually helps your clients effectively operate their end-to-end business processes.
